Farington Moss,
Leyland,
United Kingdom

Imaginative and motivated Junior Developer capable of producing quality, test-driven code, interested in all aspects of Software Development.

A background in art and design has given me invaluable divergent thinking and a meticulous approach to all of my work. As a CMS Developer, I was a constant go-between for clients and Software Engineers, enhancing my interpersonal skills and refining my understanding of technical requirements.

I continue to cultivate my tech knowledge through my projects, cohort pair-programming and working through the Odin Project.

GENERAL SKILLS

TEAM-PLAYER

My previous work required me to mediate between our team members to communicate all requests and technical issues.

CREATIVE

My art background gave me an eye for front-end design and even structuring code in a readable fashion.

PROBLEM-SOLVER

CMS development involved understanding and solving system errors frequently occurring, working around software that was in place for many years and changed by multiple developers.

COMMUNICATOR

As a freelance designer, I had to build strong relationships with my clients and understand their needs.
