EDUCATION

Full Stack Software Engineering Bootcamp
Makers Academy
March 2022

Foundation Degree, Digital Film, Games, and Animation
Leeds College of Art
2010 - 2013

Imaginative and motivated Software Developer capable of producing quality, test-driven code, interested in all aspects of Tech Development. I love creative thinking and the aim to improve others' lives through software.

A background in art and design has given me invaluable divergent thinking and a meticulous approach to all of my work. As a CMS Developer, I was a constant go-between for clients and Software Engineers, enhancing my interpersonal skills and refining my understanding of technical requirements.

I continue to cultivate my tech knowledge through my projects, cohort pair-programming and working through the Odin Project.

MAKERS ACADEMY BOOTCAMP   **MARCH 2022**

FULL STACK SOFTWARE DEVELOPMENT
- Fundamentals of object-oriented languages.
- Able to write meaningful tests (behaviour vs state).
- Learnt a consistent debugging process to resolve issues.
- Designed database schemas.
- Deployed web applications using a light cloud service such as Heroku.
- Pair programming and group projects using Agile values and principles.
- Using branch/PR/merge git workflow, code reviews and Github Actions for automated testing.
- Built single-page web applications fetching and updating remote data using JS, with and without React.
